GIN EXPERIENCE

GIN

Gin is provenance; it looks to the natural world for flavour, aroma and sensation. Gin is the quintessential cocktail ingredient, and since the turn of the twentieth century has been a bartender's favourite cocktail spirit. It is a beacon for sophistication and style, yet is founded upon mayhem and grit. Gin is a delicious spirit; it runs the gamut of fresh, vibrant and zesty, to floral, soft and delicate.

THE GIN GARNISH GUIDE

Every gin has its own flavour profile and your choice of garnish can make or break your gin and tonic. Garnishes typically either match and harmonise with a gin's key flavours or contrast and balance them. For example, Boodles Gin includes no citrus botanicals in the distillation in anticipation of being served with a lemon garnish. We've given accessible options and two suggestions where possible, based on our tastings and the distiller's suggested 'perfect serve'.

Ultimately there is no 'correct' choice of garnish or 'perfect serve' and it comes down to your own preferences, so take this guide as a starting point and the beginning of your experiments on how to serve each gin!

Enhance your drinks with couple dash of The Bitter Truth, it provides balance and depth.
